(General Data Protection Regulation, hereinafter GDPR), grants each

control authority and as established in articles 47, 48.1, 64.2 and 68.1 of the

Organic Law 3/2018, of December 5, on the Protection of Personal Data and

guarantee of digital rights (hereinafter, LOPDGDD), is competent to

initiate and resolve this procedure the Director of the Spanish Protection Agency

of data.

Likewise, article 63.2 of the LOPDGDD determines that: "The procedures

processed by the Spanish Data Protection Agency will be governed by the provisions

in Regulation (EU) 2016/679, in this organic law, by the provisions

regulations dictated in its development and, insofar as they do not contradict them, with character

subsidiary, by the general rules on administrative procedures."

II

The image is a personal data

The physical image of a person, according to article 4.1 of the GDPR, is data

personnel and their protection, therefore, is the subject of said Regulation. In article 4.2

of the GDPR defines the concept of "processing" of personal data.

The images generated by a system of cameras or camcorders are data of

personal nature, so its treatment is subject to the protection regulations

of data.

It is, therefore, pertinent to analyze whether the processing of personal data (image of the natural persons) carried out through the denounced video surveillance system is in accordance with the provisions of the GDPR.

II

Infringement

Article 6.1 of the GDPR establishes the assumptions that allow the use of processing of personal data.

Regarding treatment for video surveillance purposes, article 22 of the LOPDGDD establishes that natural or legal persons, public or private, may carry out carry out the treatment of images through systems of cameras or video cameras in order to preserve the safety of people and property, as well as their facilities.

The processing of personal data is subject to the rest of the principles of the treatment contained in article 5 of the GDPR. We will highlight the principle of minimization of data contained in article 5.1.c) of the GDPR which provides that personal data will be "adequate, relevant and limited to what is necessary in relation to for the purposes for which they are processed".

This means that in a specific treatment only the data can be processed timely personal, that come to the case and that are strictly necessary to fulfill the purpose for which they are processed. Treatment must be adjusted and proportional to the purpose to which it is directed. The relevance in the treatment of

data must occur both at the time of data collection and at the time of subsequent treatment carried out on them.

In accordance with the above, the processing of excessive data must be restricted or proceed to their deletion.

The application of the principle of data minimization in the field of video surveillance means that images of the public thoroughfare cannot be captured, since the treatment of images in public places, unless authorized government, can only be carried out by the Security Forces and Corps.

On some occasions, for the protection of private spaces, where cameras installed on facades or inside, may be necessary to ensure the security purpose the recording of a portion of the public thoroughfare.

That is, cameras and camcorders installed for security purposes may not be obtain images of public roads unless it is essential for said purpose, or it is impossible to avoid it due to their location. And in such a case extraordinary, the cameras will only be able to capture the minimum portion necessary to preserve the safety of people and property, as well as its facilities.

In no case will the use of surveillance practices beyond the environment be admitted. object of the installation and, in particular, not being able to affect public spaces surroundings, adjoining buildings and vehicles other than those that access the space guarded.

Installed cameras cannot get images from third-party proprietary space and/or public space without duly accredited justified cause, nor can they affect the privacy of passers-by who move freely through the area.

It is not allowed, therefore, the placement of cameras towards the private property of

neighbors with the purpose of intimidating them or affecting their private sphere without cause justified.

Nor can images be captured or recorded in spaces owned by third parties without the consent of their owners, or, where appropriate, of the people who find.

Likewise, it is disproportionate to capture images in private spaces, such as such as changing rooms, lockers or rest areas for workers.

IV.
