Completely remote controlled? Five days of "data radio extra": State data protection officer and consumer advice center start podcast week on artificial intelligence the subject of artificial intelligence (AI). Among other things, the opportunities and risks of AI, language assistants, autonomous driving and the effects on consumption will be highlighted. "AI and the algorithms behind it have long since arrived in our everyday lives," says Maximilian Heitkamper, Head of Digital and Consumer Law at the consumer advice center. They increasingly penetrate all areas of life. The technology makes big promises, but also sparks fears. "It's high time to take a close look at this important complex of topics from the joint perspective of data protection and consumer protection officers," says Dr. Philipp Richter, moderator and responsible for the "data radio" podcast at the LfDI. In addition to data protection and consumer protection experts, guests from science and politics also have their say in the individual episodes, bringing in their specialist expertise and ensuring insightful, exciting and at the same time entertaining discussions.

Interested parties can find more information about the podcast week at <https://www.wmk-rlp.de/aktionsubersicht/>. The special series runs as part of the LfDI's "data radio" podcast and can also be accessed here:

<https://www.datenschutz.rlp.de/de/themenfelder-themen/online-services/podcast/>
