the

digitalization

of healthcare

brings

numerous

data protection issues

for patients to take with them. the

Health care is to be improved with increasing digitization

at the same time the rights of the patients concerned must be protected.

Against this background, a LfDI officer explains in a lecture on

Thursday, May 5, at 4:30 p.m., using current examples from the

Digitization in the healthcare system, the basics of data protection law

and primarily addresses the rights of the persons concerned.

In particular using the examples of digital health applications

and the electronic patient file are intended to comply with data protection law

Special features highlighted and an overview of the rights of the

affected. At the same time there is an introduction to the principles

of data protection law in the healthcare sector to protect the right to

informational self-determination of the patients with regard to

of their

particularly sensitive data.

The event is aimed at anyone interested in

digitalization

related to healthcare. Participation in the

Event is free.
