

Data Protection Impact Assessment

with Bavarian authorities

Published by the Bavarian State Commissioner for Data Protection

the "Bavarian Blacklist" for data protection impact assessment

extensive accompanying material.

Press Release – Page 1/2

Munich, March 6th, 2019

With the introduction of the General Data Protection Regulation, the

authority of the Bavarian authorities relevant data protection law 2018

fundamentally reformed. Known and proven regulations of the old

Since then, on the right are still unfamiliar provisions that are in the

Administrative practice first have to "arrive" - also because labor

processes are to be adapted and new experiences are to be gained.

The data protection impact assessment did not exist in the old law. Nice

before the 2018 data protection reform, authorities responsible for personal

process data, but obliged to provide a sufficient level of data

to ensure safety. If data processing is expected to have a high

risk to the rights and freedoms of individuals

the person responsible for them under the new law now has a data protection

carry out an impact assessment. In doing so, he develops a structured

description of the risks and assigns them suitable technical and organizational

satirical measures against.

Bavarian authorities are responsible for countless data processing

lich. This may also include such processing that one

require a data protection impact assessment. To identify this

To make "high-risk processing" easier, I published the "Bayerische

Blacklist" published, which lists the most important cases. I am for that

otherwise obligated under the General Data Protection Regulation.
