Decision

Public authorities

In the supervision of Alm. Brand Forsikring A / S concludes that the Danish Data Protection Agency states that Alm. Brand Forsikring A / S 'processing of personal data is generally organized and carried out in accordance with the rules in the Data Protection Ordinance.

Journal number: 2019-41-0034

Summary

In November 2020, the Danish Data Protection Agency completed 15 planned inspections to shed light on the data controllers' ability to make the relevant reports of breaches of personal data security. In general, it has been gratifying to be able to state that all the data controllers examined have focused on the task, where in the respective organizations there was the necessary knowledge and routine, so that security incidents were intercepted and reported.

Criticism has been expressed in two of the cases: Both incidents were notifiable breaches of personal data security, which were only classified as security incidents. The specific assessment of whether there was a processing of information on natural persons was not made correctly by the actor in question.

Alm. Brand Forsikring A / S was among the private companies that the Danish Data Protection Agency had chosen in the spring of 2019 to supervise in accordance with the Data Protection Ordinance [1] and the Data Protection Act [2].

The Danish Data Protection Agency's audit was a written audit, which focused in particular on whether Alm. Brand Forsikring A / S reports breaches of personal data security in accordance with Article 33 (1) of the Data Protection Regulation. 1, and about Alm. Brand Forsikring A / S fulfills the requirement to document all breaches of personal data security, cf. Article 33, subsection 5.

Alm. Brand Forsikring A / S has also, in connection with the supervision, at the request of the Danish Data Protection Agency, generally reported on Alm. Brand Forsikring A / S 'training of employees - in relation to the handling of breaches of personal data security - with a view to Alm. Brand Forsikring A / S may comply with Article 33 of the Data Protection Regulation.

By a letter dated 11 March 2019, the Danish Data Protection Agency's supervision was notified to Alm. Brand Forsikring A / S,

and Alm. Brand Forsikring A / S was on the same occasion requested, among other things, to answer a series of questions. By letter dated 13 March 2019, Alm. Brand Forsikring A / S a statement in which Alm. Brand Forsikring A / S in connection with the answers to the Danish Data Protection Agency's questions sent documentation (in the form of several documents) that sheds light on all registered breaches of personal data security, which have been reported to the Danish Data Protection Agency in the period from 25 May 2018 to 8 March 2019. Alm. Brand Forsikring A / S 'answer was also attached to a number of other documents, including Alm. Brand Forsikring A / S 'data breach contingency plan, pamphlets and guidelines, which Alm. Brand Forsikring A / S applies to comply with Article 33 of the Data Protection Regulation.

Decision

After the supervision of Alm. Brand Forsikring A / S finds the Danish Data Protection Agency reason to conclude that Alm. Brand Forsikring A / S 'processing of personal data is generally organized and carried out in accordance with the rules in Article 33 of the Data Protection Regulation.

In the opinion of the Danish Data Protection Agency, Alm. Brand Forsikring A / S has thus implemented the measures necessary to comply with the requirements of Article 33 (1) of the Data Protection Regulation. 1, and thereby ensure that breaches of personal data security are detected in the organization and registered, so that these are always assessed with a view to whether the breach must be reported to the Danish Data Protection Agency.

Furthermore, the Danish Data Protection Agency finds that Alm. Brand Forsikring A / S as a whole has complied with the requirements of Article 33 (1) of the Data Protection Ordinance. 5.

In addition, it is the Data Inspectorate's assessment that Alm. Brand Forsikring A / S has carried out appropriate training activities, e.g. in order to be able to support the identification and management of breaches of personal data security.

It also appears from the case that Alm. Brand Forsikring A / S has initiated various activities with a view to educating and informing employees about data protection, including the handling of breaches of personal data security.

Below is a more detailed review of the information that has emerged in connection with the audit and a justification for the Danish Data Protection Agency's decision.

2. Notification of breaches of personal data security

A breach of personal data security is defined in Article 4 (12) of the Data Protection Regulation as a breach of security leading to accidental or unlawful destruction, loss, alteration, unauthorized disclosure of or access to personal data transmitted, stored

or otherwise treated.

It also follows from Article 33 (1) of the Data Protection Regulation (1) that in the event of a breach of personal data security, the controller shall, without undue delay and if possible within 72 hours after the controller has become aware of the breach of personal data security, notify the supervisory authority competent in accordance with Article 55, unless the breach of personal data security is unlikely to involve a risk to the rights or freedoms of natural persons. If the notification to the supervisory authority is not made within 72 hours, it must be accompanied by a reason for the delay.

Alm. In a statement of 13 March 2019 to the Danish Data Protection Agency, Brand Forsikring A / S has stated that in the period from 25 May 2018 to and including 8 March 2019, a total of 42 breaches of personal data security have been registered, cf. Article 4, no. 12 of the Data Protection Ordinance. Out of the 42 breaches, Alm. Brand Forsikring A / S reported the 22 to the Danish Data Protection Agency, and in 20 remaining cases, Alm. Brand Forsikring A / S assessed that there was no obligation to report the breach to the Danish Data Protection Agency.

During the audit, the Danish Data Protection Agency has taken a position on whether Alm. Brand Forsikring A / S has complied with the requirement that all relevant breaches of personal data security have been reported to the Danish Data Protection Agency, cf. Article 33 (1) of the Data Protection Ordinance. 1.

With regard to the 42 incidents, the Danish Data Protection Agency has received 22 of these as reports of breaches of personal data security. For the 20 incidents reported by Alm. Brand Forsikring A / S is categorized as a breach of personal data security, but which has not been reported to the Danish Data Protection Agency, the Authority can join Alm. Brand Forsikring A / S 'assessment that the incidents in question can be characterized as a breach of personal data security, cf. Article 4, no. 12 of the Data Protection Scheme, but that these are not covered by the obligation to make a notification. In this connection, the Danish Data Protection Agency has assessed that it must be described as unlikely that the violations in question entail a risk to the rights and freedoms of natural persons, cf. Article 33 (1). 1.

Overall, the Danish Data Protection Agency has therefore not found grounds to conclude that Alm. Brand Forsikring A / S has registered a breach of personal data security, which should have been reported to the Danish Data Protection Agency, but which has not been.

Documentation of breaches of personal data security

According to Article 33 (1) of the Data Protection Regulation 5, the data controller shall document all breaches of personal data

security, including the facts of the breach of personal data security, its effects and the remedial measures taken. This documentation must be able to enable the supervisory authority (Datatilsynet) to check that the provision has been complied with.

It is noted that no specific formal requirements are set for the documentation, and the data controller can therefore decide for himself how the information is to be collected and how it is to be presented. However, the documentation must in all cases contain a number of information, cf. the wording of the provision above. The Danish Data Protection Agency's guidelines from February 2018 on handling breaches of personal data security state on page 27 that the requirements for documentation can be set out as follows:

Date and time of the breach

What happened in connection with the breach?

What is the cause of the fracture?

What (types) of personal information are covered by the breach?

What are the consequences of the breach for the affected persons?

What remedial action has been taken?

Whether - and if so how - has the Danish Data Protection Agency been notified? Why / Why not?

The data controller should thus document his reasons for all significant decisions made as a result of the breach. This applies not least if the data controller, after assessing the breach, has come to the conclusion that it should not be reported to the Danish Data Protection Agency.

The 42 breaches of personal data security, which Alm. Brand Forsikring A / S in connection with the audit has submitted material on, appears from a comprehensive list. This list lists the 22 breaches that have been reported to the Danish Data Protection Agency and the 20 breaches where no notification has taken place.

After reviewing Alm. Brand Forsikring A / S 'own documentation for the 22 breaches of personal data security, which Alm. Brand Forsikring A / S has reported to the Danish Data Protection Agency, the Authority may in this connection state that Alm. Brand Forsikring A / S has described the actual circumstances of the breach and stated a reason why the breach was reported to the Danish Data Protection Agency.

It is - after reviewing all the material in question - the Data Inspectorate's assessment that Alm. Brand Forsikring A / S has

provided the required documentation.

Against this background, it is the Data Inspectorate's assessment that Alm. Brand Forsikring A / S as a whole has complied with the requirements of Article 33 (1) of the Data Protection Ordinance. 5.

The Danish Data Protection Agency has also reviewed Alm. Brand Forsikring A / S 'own documentation for the 20 breaches of personal safety, which has not been reported to the Danish Data Protection Agency. In this connection, the Authority can state that Alm. Brand Forsikring A / S has described the actual circumstances of the breach and stated a reason why the breach was not reported to the Danish Data Protection Agency. The Danish Data Protection Agency has assessed that the scope of the specified documentation has been sufficient for the Authority to be able to conclude that it must be described as unlikely that the violations in question involve a risk to the rights and freedoms of natural persons, cf. Article 33 (1) of the Regulation. 1.

4. Training of employees

It is clear from Article 32 (1) of the Data Protection Regulation 1, that the data controller must implement appropriate technical and organizational measures to ensure an appropriate level of security.

Among other things, is required that the data controller must ensure that all employees in the organization are, to the extent necessary, aware of any internal procedures for handling breaches of personal data security, that certain relevant employees can identify and assess breaches of personal data security, in addition it is a necessity for that the organization as a whole is otherwise able to support the obligation to make reports, etc. pursuant to Article 33 of the Data Protection Regulation.

The Danish Data Protection Agency has noted that Alm. Brand Forsikring A / S has prepared guidelines and carried out a number of activities with a view to training employees in data protection, including with a view to employees being able to identify and possibly handle breaches of personal data security.

The Danish Data Protection Agency has not had the opportunity to take a specific position on whether all relevant employees have completed the training activities in question. On the other hand, the Authority has reviewed the content of the attached training material, including the booklet and the service portal material, and has on that basis assessed that Alm. Brand Forsikring A / S has carried out appropriate training activities, e.g. in order to be able to support the identification and management of breaches of personal data security.

5. Summary

After the supervision of Alm. Brand Forsikring A / S finds the Danish Data Protection Agency reason to conclude that Alm.

Brand Forsikring A / S 'processing of personal data is generally organized and carried out in accordance with the rules in Article 33 of the Data Protection Regulation.

In the opinion of the Danish Data Protection Agency, Alm. Brand Forsikring A / S has thus initiated the measures necessary to be able to comply with the requirements of Article 33 (1) of the Data Protection Regulation. 1, and thereby ensure that breaches of personal data security are detected in the organization and registered, so that these are always assessed with a view to whether the breach must be reported to the Danish Data Protection Agency.

Furthermore, the Danish Data Protection Agency finds that Alm. Brand Forsikring A / S as a whole has complied with the requirements of Article 33 (1) of the Data Protection Ordinance. 5.

In addition, it is the Data Inspectorate's assessment that Alm. Brand Forsikring A / S has carried out appropriate training activities, e.g. in order to be able to support the identification and management of breaches of personal data security.

The Danish Data Protection Agency hereby considers the case closed and does not take any further action.

[1] Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of individuals with regard to the processing of personal data and on the free movement of such data and repealing Directive 95/46 / EC (General data protection regulation)

[2] Act No. 502 of 23 May 2018 on additional provisions to the Regulation on the protection of individuals with regard to the processing of personal data and on the free movement of such data. (Data Protection Act)
