

Friday, November 9th, 2018 2: Press releases How do you build data protection into software? KoSSE workshop "Data Protection by Design" on November 14, 2018 The Competence Network Software Systems Engineering and the Independent State Center for Data Protection discuss the new requirement "Data Protection by Design".

The workshop on November 14, 2018 from 1 p.m. to 5 p.m. in the IHK in Kiel is open to all interested parties and is free of charge. Registration is requested at www.diwish.de. With the General Data Protection Regulation (GDPR), which has been in force since May, a data protection requirement has come into focus that affects the development of software: "Data Protection by Design". Developers are now faced with the challenge of implementing this abstract requirement in concrete terms. The Competence Network Software Systems Engineering (KoSSE) cordially invites you to the KoSSE Workshop 2018 with the Independent State Center for Data Protection Schleswig-Holstein (ULD). There you will have the opportunity to find out about the current state of research and practical solutions. After an introduction by Marit Hansen, the state representative for data protection in Schleswig-Holstein, Prof. Dr. Hannes Federrath (Uni HH), President of the Gesellschaft für Informatik, presented software support for the implementation of the standard data protection model. With an insight into a current research project at the CAU by Dr.-Ing. Reiner Jung and the practical experience of an entrepreneur by Andreas Großmann (PLATO AG, Lübeck) will round off the range of lectures. The workshop will provide an opportunity for exchange and networking. We ask that you register for the KoSSE workshop by November 12, if possible, at:
