BayLDA on the "illegal parking photographers" decision of the VG

Ansbach from 03.11.2022

The Bavarian Administrative Court in Ansbach has two decisions from the Bavarian State Office for data protection supervision (BayLDA) on "illegal parking photographers".

The reasons for the verdict are not yet known.

The President of the BayLDA, Michael Will, states: "As soon as the reasons for the judgment are available, we will analyze them carefully. We will pay special attention to it

judge whether the decision is determined by the particular circumstances of the cases at hand

or whether this is a critical reassessment of the use of data protection

Photographs in public space, e.g. according to case law on the use of dash cams is initiated."

The BayLDA will also use the procedures as an opportunity to hold coordination talks

the competent regulatory authorities, in particular the police. should

clear and uniform information can be achieved about what information is given in a

Reporting reimbursement for illegal parking is required and which communication channel

should be used for this.
